

I am asking you to reject petition 04-160 from the NAB. This is a clear violation of First Amendment rights. To not receive information over the XM satellite system is an obvious attempt by the NAB to stifle competition. I urge you to keep this type of programming available to those of us willing to pay for such. The type of programming in question is not available on any over the air station in my area.

Thank you,

Alan Byrnes
Lacey, WA
